

“A complete overview and reporting mechanism to track order production from beginning to end. In addition we wanted a system that could remotely take customer orders at trade fairs and sync to our ERP and instantly generate purchase orders. This was done with the addition of coresuite.”

Helen Hattingh, Operations Coordinator Source SA

Industry Export and distribution of arts and craft products

Reasons for choosing SAP One of the major reasons in choosing SAP Business One is that it came highly recommended. We needed a solution that could handle the multitude of unique images that drive our business.”

Key benefits Management reporting of outstanding debtors and ageing, overview of production time line, open purchase and sales orders, number of new business partners loaded, graphic images/ pie charts of sales value.

Customer quotes “We were using Pastel Partner as our accounting platform which could not co-ordinate shipments to customers and purchase orders. Shipments and purchase orders could only be accessed by the finance department who has access to Pastel. It also did not do any of the shipment’s pack lists and commercial invoices . We had to manage this process in manually in excel.”

“Bluekey managed our project very well. We were very happy with the end-user training that was given to us and the fact that we were not way over budget.”

Previous System Pastel Partner
