

SAP Business One Inventory Management

“SAP Business One will allow great transparency into our costs, efficiencies and margins to ensure sustained profitability, competitiveness and to cater for future growth.”

Adam Cox,
Chief Financial Officer

Industry	Contract Manufacturing in the SMT industry, specializing in electronic PC board assembly
SAP Users	28
Reasons for choosing SAP	SAP Business One was able to provide the financial, inventory, procurement, sales and production capabilities needed by the business.
Key benefits	Improved inventory control, visibility and valuation; faster quoting; control and transparency over job margins; streamline administrative functions; integration; reduce dependency on manual & third party systems.
Customer quotes	“Our need to more accurately track our stock values and cost of sales has compelled us to implement an integrated system that manages our entire business from quoting, ordering, receiving, production and sales - all across one financial system.”
Previous System	Pastel + Bespoke job costing solution
